Addison, IL - (September 30, 2015) – Following the worst stock market quarterly performance since 2011 and as record low interest rates continue, **Dr. Robert Genetski** will try to make sense of the current market turmoil and what lies ahead at an upcoming Economic Forecast breakfast event.

Genetski will deliver his forecast on Wednesday, Oct. 21 at Alta Villa Banquets, 430 N. Addison Rd., Addison. The event, co-sponsored by Oxford Bank & Trust and the Addison Chamber of Commerce & Industry, will begin with a hot buffet breakfast at 7:30 a.m. followed promptly by Genetski's comments. Tickets at \$25 per person are available at [addisonchamber.org](http://addisonchamber.org) or by calling **630-543-4300**.

Genetski is the founder and President of **ClassicalPrinciples.com**, a global economic and financial consulting service. On two separate occasions Genetski has been singled out as the number one interest rate forecaster in the United States.

His experience in the world of economics and finance involves a unique combination of business and academic expertise. He has headed asset management, investment research departments and served as the chief economist for several financial institutions. He has also taught economics at NYU and the University of Chicago's Graduate School of Business.

Genetski is known for using humor and anecdotes to make complex economic principles easily understandable. For five consecutive years he has been recognized as one of the top five speakers in the field of Economics/Finance. He has appeared on CNN and Fox News and his articles have appeared in the Fortune, The Wall Street Journal and Investors' Business Daily. He has served on the board of directors for a number of public companies.

He is the author of a number of books, notably *A Nation of Millionaires*, *Taking the Voodoo out of Economics*, and *Winning with Money*. Dr. Genetski's latest book, *Classical Economic Principles & the Wealth of Nations* has received rave reviews for its clear, concise explanation of the economic policies necessary to promote wealth and prosperity. It is currently being translated into Chinese.

Dr. Genetski has been a longtime advocate of classical economic principles. He has used these principles to create highly accurate economic and financial forecasts—correctly predicting stagnation in 1977, economic revival in the 1980s and 1990s, to predicting the historically low interest rates during the past decade. In early 2008, six months before the financial collapse, he joined President Reagan's chief economic advisor in warning it was too late to avoid a recession since "The Fed has inadvertently adopted an overly restrictive policy that has hastened the spread of bankruptcies and financial failure."
